EMPLOYMENT HISTORY

DEVELOPER
2017
CARNEY - CARNEY.CO
PITTSBURGH, PA

Worked individually & with colleagues to develop and maintain websites and web apps for clients, including:

- Transforming UI mockups into responsive web elements and websites
- Building elements from scratch using modern, aesthetically pleasing design principles
- Creating database maps and building scalable databases for apps
- Maintaining a clean programming workflow with colleagues using Gitlab
- Consulting with clients regularly in order to meet and exceed their expectations
- Language focuses at this position included: HTML5, CSS3 and SASS, Ruby & Rails, NodeJS, PHP and Laravel.
- Also worked with Yarn, Gulp, Middleman and Docker.

PROJECT HIGHLIGHT

CARNEGIE MUSEUMS OF PITTSBURGH
CARNEGIEMUSEUMS.ORG

- I was the primary developer of the Carnegie Museums website redesign.
- I created a custom 100+ page Wordpress website to meet the museum's needs using BladePHP language as well as Node, SASS, HTML/CSS, and the Yarn preprocessor.
- I consulted and spoke regularly with the Carnegie Museums staff to build this website, which includes the online version of their monthly magazine.
